CPU Performance is based on Geekbench v6.2 Single-Core on Windows 11 OS run in October 2024, Snapdragon X Elite (XIE-80-100) was tested using a Dell XPS 13 (9345) on "Balanced" Power Mode in Windows and "Optimized" in Dell Power Manager. Intel Core Ultra 7 256V was tested using a Dell XPS 13 (9350) on "Balanced" Power Mode in Windows and "Standard mode" in Windows and "Optimized" in Dell Power Manager. The AMD Ryzen AI 9 HX 370 was tested using an ASUS Vivobook S 14 (M5406WA) on "Balanced" Power Mode in Windows and "Standard mode" in MyASUS. Power and performance comparison reflects results based on measurements and hardware instrumentation of given devices.

faster performance
at iso-power

Competitor requires

168%

more power
at iso-performance

Multi-Core (Geekbench)

Snapdragon delivers up to

157%

faster performance
at iso-power

Competitor requires

240%

more power
at iso-performance

CPU Performance is based on Geekbench v6.2 Single-Core and Multi-Core on Windows 11 OS run in November 2024. Snapdragon X (X1-26-100) was tested using a Qualcomm reference design on Windows 11 OS. The Intel Core 5 120U was tested using an Dell Inspiron 14 (7440 2-in-1) laptop on Windows 11. Both platforms' Single-Core iso-power performance measured at 6.1W INPP (Idle-Normalized Platform Power). Intel Core Ultra 5 120U Single-Core iso-performance power measured at 16.5W INPP. Both platforms' Multi-Core iso-power performance measured at 14.5W INPP (Idle-Normalized Platform Power). Intel Core Ultra 5 120U Multi-Core iso-performance power measured at 49.3W INPP. Power and performance comparison reflects results based on measurements and hardware instrumentation of given devices.

120U

Browser performance is based on Speedometer 3.1 performance in the Google Chrome browser on Windows 11 OS run in November 2024. Productivity performance is based on ULI Procyon Office Productivity on Windows 11 OS run in November 2024. Snapdragon X 8-core (X1-26-100) was tested using a Qualcomm laptop reference design on Windows 11 OS. The Intel Core 5 120U (10 core) was tested using an Dell Inspiron 14 (7440 2-in-1) laptop on Windows 11. Power and performance comparison reflects results based on measurements and hardware instrumentation of given devices.

Battery Life Leadership for Windows

Estimated relative battery life

Power is measured while running the indicated test application run in Windows 11 in November 2024. Snapdragon X 8-core (X1-26-100) was tested using a Qualcomm reference design on Windows 11 OS. The Intel Core Ultra 7 155U (12 core) was tested using an Asus ZenBook S 13 OLED (UX3405) laptop on Windows 11. On battery performance measured on "Balanced" Power Mode in windowsPower and performance comparison reflects results based on measurements and hardware instrumentation of given devices. Battery life varies significantly with settings, usage, and other factors.

CPU Performance is based on Geekbench v6.2 Multi-Core on Windows 11 OS run October 2024. Snapdragon X was tested using a Qualcomm reference design. Intel Core 5 120U was tested using a Dell Inspiron 16 Laptop. Maximum performance reflected by Intel Core 5 120U represent maximum achievable results in given platforms under unconstrained PL1/PL2 settings and no thermal limitations. Power and performance comparison reflects results based on measurements and hardware instrumentation of given devices. Lowest power and performance figures may not represent the lowest achievable platform power and performance. Power and performance comparison reflects results based on measurements and hardware instrumentation of given devices. Battery life varies significantly with settings, usage, and other factors.

The best and newest Copilot+ experiences run on Snapdragon, powering all tiers.
